CAREER OBJECTIVE

Recent B.Sc. graduate transitioning into Cloud Computing and DevOps, currently pursuing the **AWS Certified Solutions Architect – Associate (SAA-C03)**. Hands-on experience with **AWS, Linux, Networking, Docker, Kubernetes, and Python** through self-driven projects covering cloud infrastructure, deployment, monitoring, and automated recovery. Eager to bring a strong technical foundation and problem-solving mindset to an entry-level Cloud/DevOps role.

PROJECTS

AWS Quick-Loan – Cloud-Based Loan Application

AWS EC2, VPC, S3, Route 53, ALB, Auto Scaling, PHP, MySQL, Nginx

- Deployed a PHP-based loan application with a MySQL database on AWS EC2.
- Designed VPC networking with public/private subnets, routing, NAT Gateway, and security groups.
- Configured Route 53, Load Balancer, and Auto Scaling for a scalable, highly available deployment.

AWS Self-Healing Infrastructure – Automated EC2 Recovery

AWS EC2, CloudWatch, SNS, Lambda, IAM, Auto Scaling, Route 53, Load Balancer

- Built an automated EC2 recovery system using CloudWatch, SNS, and Lambda.
- Configured CPU, memory, and disk alarms to trigger automated remediation actions.
- Implemented service restart and EC2 instance replacement with CloudWatch logging and Auto Scaling.

AWS Complete Website with Hosting

AWS EC2, CloudWatch, SNS, Lambda, Auto Scaling, S3, DynamoDB, Load Balancer, VPC, IAM, Route 53

- Hosted and deployed a full website on AWS EC2 with S3 and DynamoDB for storage and data.
- Configured VPC, Load Balancer, and Auto Scaling for resilient, scalable delivery.
- Set up CloudWatch monitoring and SNS/Lambda-based alerting for operational visibility.

EDUCATION

Bachelor of Science— Dr. D.Y. Patil ACS College, Pune

2023 – June 2026 | CGPA: 7.55

EXPERIENCE

NexGen Analytix — Cloud/DevOps Intern

June 2026 – Present

- Working on AWS cloud projects involving EC2, S3, and IAM under team guidance.
- Assisting with monitoring and basic troubleshooting using CloudWatch.
- Supporting Docker-based deployment tasks as part of ongoing DevOps workflows.

SKILLS

- Cloud: AWS (EC2, S3, VPC, IAM, RDS, Lambda, EBS, ELB, Auto Scaling, Route 53, CloudFront)
- DevOps: Docker, Kubernetes, CI/CD, Infrastructure as Code (learning Terraform, Jenkins, Ansible)
- Monitoring: CloudWatch, CloudTrail
- Networking: TCP/IP, DNS, HTTP/HTTPS, Subnetting, Routing, VPC Networking
- Programming/Scripting: Python (Loops, OOP, NumPy, Pandas), SQL (Basics), Bash
- Infrastructure: CloudFormation, Load Balancing, Auto Scaling
- Security: AWS Security, IAM, Linux Security
- Tools: Git, GitHub, VS Code, MySQL
- Operating Systems: Linux (Ubuntu), Windows, macOS
- Concepts: Cloud Computing, Virtualization, High Availability, Scalability, Fault Tolerance

SOFT SKILLS

• Strong Communication • Quick Learner • Adaptability & Team Collaboration • Problem-Solving Mindset
